

Precision Formulary Preventive Medications

Certain preventative medications can be obtained at zero or low cost before the deductible is satisfied depending on your specific plan documents. Medications must be covered by your plan to be eligible for the preventive medication program— not all strengths and dosages will be covered.

To check the cost of a medication, refer to your benefit handbook or contact customer service at the toll-free member phone number on your benefit plan ID card.

Quality Driven and Cost-Conscious Medications

As the pharmacy benefit manager for your benefit plan, Magellan Rx Management strives to offer you access to a broad choice of medications at a reasonable price.

The Preventive Medication List is a subset of products included within your plan's preferred, or formulary, medication list, which tells you what medications your plan covers.

This list contains products that meet the interpretation of the Internal Revenue Service (IRS) guidance for preventative medications; it is not inclusive of all preventative medications and does not guarantee coverage by your pharmacy benefit. This list is intended as a reference, and is subject to change throughout the year.

For a complete copy of your formulary listing, call customer service.

Proactive Therapy

Preventive medications help protect against or manage a medical condition. They may provide prenatal care, prevent osteoporosis or reduce risk of blood clots, stroke and heart disease.

Taking preventive medications as directed by your doctor can help avoid serious health problems. That may mean fewer doctor visits and hospitalizations, reducing your total health care costs.

Money Saving Generics

To get the most from your benefits, ask your doctor if there's a generic medication that's right for you. Generics normally cost less than brand medications, and the Food and Drug Administration (FDA) requires them to be just as safe and effective.

For More Information

If you have questions or would like additional information on the Preventive Medication List, please contact customer service at the toll-free member phone number on your ID card.

A list of covered preventive medications begins on the next page. Medications are listed by therapeutic category.

KEY:

Generics: Lower case italic. For example, *acarbose*

Brands: Capitalized and not italics. For example, Abilify

SPC: Specialty
